 <https://www.yogeshrajadev.com>

Enthusiastic and self-motivated Web developer with 2+ years of experience. Eager to join Studio Shodwe and bring my skills in frontend development, and visual design to every project that will be received in the future. A previous project for improving and redesigning reallygreatsite.com resulted in an increase in web traffic by 50% and performance improvement by 20%.

Professional

- Junior Software Engineer | *Revolution Games India Pvt. Ltd.* May 2024- Present
- 2 years of experience in React JS, 6 months of experience in Node JS, 2 months of hands-on experience in Flutter

Skills

- React JS
 - JavaScript
 - Node JS
 - MySQL
 - Bootstrap
- Redux
 - HTML5
 - TypeScript
 - CSS
 - Gira
- Rest API
 - SCSS
 - GitHUb
 - Bootstrap
 - Figma

Projects worked

- Project Title: Hint Social | Junior Web Developer May 2022- Sept 2023

Description:

- Hint Social is a multi-platform social networking application consisting of both a mobile application for users and a web application for administrators
- Enables users to create/join groups, communicate via built-in messenger, share text/images, and discover events and activities based on their location and interest in the mobile application.
- Admins have access to individual user data and can manage it.

Technologies used:

- React JS, Redux, Rest API, Javascript, HTML5, CSS, SCSS, Bootstrap

Responsibilities and major implementations:

- Designed and developed intuitive user interfaces using Figma
- Utilized Bootstrap UI library to create responsive UI
- Managed application state efficiently using Redux
- Integrated RESTful APIs, enabling features such as user authentication, data retrieval, and update
- Collaborated with back-end developers, designers, and product managers to deliver high-quality features and enhancements.
- Used native browser developer tools to debug and troubleshoot issues
- Agile development processes, including sprint planning, discuss with Clients

● **Project Title: MyWurks | Lead Developer** *Oct 2023 - May 2024*

Description:

- Developed a role-based full-stack web application for administrators and employees, featuring employee management, task tracking, attendance system, and collaboration tools for enhanced productivity and efficient project management. Utilized Node.js for back-end development and MySQL for database management.

Technologies used:

- Node JS, MySQL, React JS, Redux, Rest API, Javascript, HTML5, CSS, SCSS, Bootstrap

Responsibilities and major implementations:

- Designed responsive UI based on Figma designs.
- Integrated APIs using REST API.
- Managed state with Redux and hooks.
- Analyzed requirements and created database designs based on wireframes.
- Collaborated with the team to develop REST APIs and intuitive interactions.
- Participated in grooming sessions to understand requirements.
- Ensured task completion within sprint duration in an Agile environment.
- Oversaw and mentored three junior developers, ensuring timely delivery of features.

● **Project Title: Drawyt | Application Developer** *June 2024 - July 2024*

Description:

- Developed a Flutter application that empowers users to create dynamic flowcharts and diagrams, enhancing their ideas, projects, and processes. Features include local and cloud storage for drafts and seamless syncing across devices for continuous workflow management.

Roles and implementations:

- Designed user interfaces for web, iOS, and Android platforms
- Collaborated with the team to refine and enhance ideas, contributing to a seamless user experience.
- Utilized VS Code debugger extension to identify and resolve issues, ensuring efficient application performance.

Education

- **Bachelor of Engineering | ECE stream | GPA: 6.19** *2015- 2019*
Hindusthan College of Engineering and Technology
- **SSLC | Score: 87%** *2013-2015*
Vivekananda Higher Secondary School
