SUMMARY

Innovative and deadline-driven Web Developer with over 2+ years of full-stack development experience. Eager to join your company and apply my skills to deliver high-quality, scalable projects. In my previous role, I consistently delivered standard code bases and high-quality results across all modules, establishing myself as a quality developer. I am seeking new opportunities to leverage my expertise in developing cutting-edge applications while driving innovation and efficiency.

SKILLS

- React JS
- JavaScript
- Node JS
- MySQL
- Bootstrap

- Redux
- HTML5
- Web hosting
- CSS
- Flutter

- Rest API
- SCSS
- GitHub
- TypeScript
- Figma

EXPERIENCE

REVOLUTION GAMES INDIA PRIVATE LIMITED   May 2022– July 2024

Junior Software Engineer

- Good knowledge of creating user-friendly web pages
- Translate UI/UX wireframes into high-quality code base
- Having good knowledge of React JS and Redux to maintain the application's state efficiently
- Good knowledge of building reusable components and front-end libraries
- Ability to identify the errors and troubleshoot them using native browser developer tools in a fast manner
- Optimize components and increase the performance across devices
- Knowing how to create and integrate RESTful APIs
- Ability to work independently and as part of a team members
- Ensure timely delivery of features as I have worked Agile Agile-based projects
- Ability to work with cross-functional teams to define and design new features

PROJECTS WORKED

HINT SOCIAL

- Hint Social is a multi-platform social networking application consisting of both a mobile application for users and a web application for administrators
- Enables users to create/join groups, communicate via built-in messenger, share media files, and discover events and activities based on their location and interest in the mobile application.
- Admins have access to individual user data and can manage it.

Implementations
- **Technologies used:** React JS, Redux, Rest API, Javascript, HTML5, CSS, SCSS, Bootstrap
- Utilized Bootstrap UI library to create responsive UI and developed intuitive user interfaces using Figma
- Integrated RESTful APIs and managed application state efficiently using Redux and Hooks methods.
- Provided technical support for clients experiencing issues, and resolved problems efficiently.

MYWURKS

- Developed a role-based full-stack web application for administrators and employees, featuring employee management, task tracking, attendance system, and collaboration tools for enhanced productivity and efficient project management. Utilized Node.js for back-end development and MySQL for database management.

Implementations
- **Technologies used:** Node JS, MySQL, React JS, Redux, Rest API, Javascript, HTML, CSS preprocessor, Bootstrap.
- Have delivered high-quality front-end designs, ensuring seamless user experiences across various devices.
- Collaborated with the team to develop REST APIs
- Responsible for database alterations and data modifications in MySQL
- Integrated REST APIs with proper error handling and managed the application's state efficiently
- Conducted code review with the team on a sprint basis | Used native browser developer tools to debug and reduce the potential errors | Improved the overall application's performance

DRAWYT

- Developed the application using Flutter technology that empowers users to create dynamic flowcharts and diagrams, enhancing their ideas, projects, and processes. Features include local and cloud storage for drafts and seamless syncing across devices for continuous workflow management.

EDUCATION

| 2015 – 2019 | Hindusthan college of engineering and Technology
B.E- ECE | CGPA 6.19 |
| 2013 – 2015 | Vivekananda Higher Secondary School
SSLC | 87% |
